Tips to Stay on Track

Learn more about the disease and its effects, so you can gain more confidence caring for someone with glaucoma.

Keep all eye drops together in one place, so you always know where they are.

Ensure the patient's eye care appointments are scheduled and that they don't miss any visits.

Add eye drops to the patient's daily routine, such as brushing their teeth in the evening.

If you or the patient have questions about eye drops, write them down and bring them to the next doctor's appointment.

Set a daily alarm on a phone or smart speaker.
You can always adjust the time if their schedule changes.
